

I have been a satellite radio customer for the past six months, and find it to be a wonderful service. I enjoy being able to listen to a wide variety of music and talk stations while I work, without commercial interruption. I am very happy that the local weather and traffic is available to me on this service. I no longer listen to regular broadcast radio at work, so I need to be able to get the local traffic report through my satellite provider. Please reject the NAB's petition 04-160 so that XM Radio can continue to provide me with the information that I need. Thank you for your consideration.
